JavaScript	JQuery	API
Bootstrap	AJAX	Node
Skype	WhatsApp	Slack

PROJECTS

Know Before You Go | <https://lain7891.github.io/know-before-you-go/>

- App provides quality of life information about a specific city and specific jobs available in said city.
- The app allows the user to make an educated decision if a city they may be considering moving to for work meets their needs. If it does then they can apply for jobs from the app. My responsibilities varied from front-end creating the layout of the page to back-end displaying the jobs on the website.
- For this project I used: HTML, JavaScript, CSS, AJAX calls, bootstrap and much more.

Guess Who | <https://lain7891.github.io/guess-who/>

- This app generates passwords at random depending on the preference of the user.
- With the many passwords we need to create nowadays, this app makes it easy for the user to create their own unique password without having to think about it.
- For this project I used: HTML, JavaScript, CSS, Document Object Model, Functions, Conditional statements, alerts and much more.

Everyday Scheduler | <https://lain7891.github.io/everyday-scheduler/>

- This app created a color-coded daily scheduler for the user.
- This was great practice in creating a functioning app dynamically that allows the user to input reminders for the workday. It also shows past, present and future times by colors to make it easier for the user to distinguish.
- For this project I used: HTML, JavaScript, CSSS, JQuery, Moments.js and much more.

WORK EXPERIENCE

Vinings Academy International Preschool
Director

June 2010-Current
Smyrna, GA

- Contributed to marketing and branding initiatives to raise awareness and reach of programs and services we provided.
- Managed year-round admission process including student recruitment, orientation and registration procedures.
- Conducted all new staff hires, training and assisted them with setting and meeting progressive goals.
- Analyzed marketing trends and used this data to stay competitive in the education market.
- Simultaneously managed resources, improved workflow, and managed over 20 staff members.
- Provided timely and transparent client feedback and answers during and outside of regularly scheduled check-ins and in order to maintain positive client relationship.
- Created team building activities for remote teams and assisted in planning yearly all staff retreat.
